Trestle Stand

Trestle Stand

An intelligent solution for an intelligent solution

Our trestles have been developed in order to keep the working area clean and give better passage. But, if they are not used they cannot be held responsible for disorder, which unless sorted as it should be, will affect the work flow.

Starke Arvid´s Trestle Stand is a product that with a surface effect collects unused trestles. With the help of this stand

up to 100 trestles can be stored on an area of only 1,5m². It is built in levels with space for 20 trestles per level and is assembled on a Europe-pallet board. With the Trestle Stand, the storage and transport of trestles becomes flexible and effective.

Stable pipe construction

Surface effect storage possibility
(100 trestles on 1, 5 m²)

Easily disassembled shelves in five positions
